XM radio provides information when I want it. Because of the ever-changing dynamic nature of the traffic situation here in Tampa XM is MUCH MUCH better at providing usable traffic information IN TIME TO MAKE A DIFFERENCE. You live in the DC area--you know how important it is to get traffic info in as close to real time as possible. XM provides that--no commercials, no DJ blather, no waiting for songs to end.

I respectfully urge REJECTION of the NAB's petition 04-160. Continuing along those lines would deprive the American public (and perhaps the entire world) of services such as CNN, the Weather Channel, and others. Consider CNN's impact.....

XM provides a superior product. Please don't allow the NAB to take it away from us.
